

Letter of Reference

Dear Mr. Green;

June 12, 2015

Please find personal reference information below regarding Mr. Dave Randall.

I first met Dave in 1994 when I was the Western Regional Construction Manager for Insight Communications. I hired Dave as one of my Construction Supervisors for our busiest region which at the time was in Phoenix, AZ. We not only served Phoenix, but several surrounding cities. At the time the greater Phoenix area was the fastest growing metropolitan area in the entire country.

Dave's knowledge of aerial and underground communications system construction is wide-spread. Dave was tasked with managing multiple contractor construction activities along with providing them the permitting and design prints necessary to keep them working. We performed all encroachment and pole attachment permit activities including fielding, redlining, drafting and submissions in-house. I once told Dave he was the only guy I knew whose hand-drafted fielded permit work was so neat and complete it could bypass our CAD department.

Years later I founded my own telecom Engineering and Design Company called Centerpoint CAD Designers, Inc. www.centerpointcad.com the business is now closed after a successful 18 year run, but the website is still operational. Centerpoint was one of the most well respected design houses in the nation serving multiple MSO's and telephony providers. Dave performed numerous fielding projects for us as I knew his permitting and field survey work was second to none.

I would highly recommend Dave for any position within a company where his talents and skills can be utilized.

I may be reached at the below contact information if further information is needed.

G. Keith Auzenne

General Manager / FNS
